C4 SPACE

SPECIALISED SUPPORT SERVICES PROVIDER

 C4 Space

 www.c4space.com.au

C4 Space is a registered business name of
C4 Engineering Pty Ltd. ABN 74 618 174 726.
Level 4, 119/24 Albert Road, South Melbourne VIC 3205.

C4 Space provides solutions to critical space-sector challenges.

Our services empower space companies and organisations to achieve your aims. We fast-track project development, pre-empt problems, surmount obstacles, inspire, and guide success.

Time, resources, and expertise are critical determinants for industry success. C4 Space can enhance your company's operations within this matrix through efficient, cost-competitive, quality solutions.

By leveraging our expertise and experience both nationally and internationally, we bring talented people to meet your project demands.

Our staff have been at the forefront of major program deliveries to defence and commercial clients across the government, maritime, and defence sectors for decades. They are leaders in their field and pioneers in the establishment of systematic approaches to the most complex problems.

www.c4space.com.au

We are one of Australia's premier providers of space-sector services and solutions.

We have an extensive search capacity of national and international candidates. Through our supplier networks, we source experienced space contractors with backgrounds in major aerospace companies.

We handle background checks, assessments, security clearances, and visa applications, as needed.

Project management	ICT architecture
Commercial services	RF communications
Publications	Artificial intelligence
Technical authoring	Mechanical
Legal services / ITAR	Satellite systems
Business development	Mechatronics
Systems engineering	Safety and risk

Test engineering	and more...

We support the development, success, and sovereignty of the Australian space sector.

INDUSTRY TRAINING PROGRAMS

We provide space industry training programs on technical and professional skills to keep your staff up-to-date and competitively focused within the global space sector. Topics include:

- ▶ International Traffic in Arms Regulations
- ▶ Cybersecurity
- ▶ Space Sector Awareness
- ▶ Other space-focused technical and business skills

EDUCATION OUTREACH

We promote space education and space careers through our Education Outreach program, which includes:

- ▶ Facilitating speaking events;
- ▶ Working with youth space organisations;
- ▶ Hosting student placements, internships, and projects; and
- ▶ Establishing partnerships with space organisations to develop and support programs for space education.
